

Your Prescription Drug Benefit: Select Standard Formulary

For the most current listing of covered medications or if you have questions, please visit www.proactrx.com or call the ProAct Help Desk at 1-877-635-9545.

Introduction

The ProAct Prescription Drug List references the most commonly prescribed medications available to treat a variety of conditions. The medications are sorted by categories or classes and are placed into levels known as “tiers” that will determine what your cost share will be (see below).

- Tier 1 = primarily generic medications
- Tier 2 = preferred brand-name medications
- Tier 3 = non-preferred medications
- Specialty Medications (SP) = also tiered, but may be subject to other copay/coinsurance structure

This is not an all-inclusive list as there may be prescription drug products that do not appear. A medication may move to a lower tier at any time, while a brand name medication may move to a higher tier when a generic becomes available. Formulary updates will occur in January and July which may result in a medication being moved to new tier resulting in a change to the copay.

Medications

Drugs are listed according to their therapeutic category or drug class. To distinguish between generic and brand medications, generic drugs will be listed in **lowercase**, while brand name medication will be in **UPPERCASE**. It is important to realize that even though a medication may be listed in this document, plan benefits override the drug listing and some items may not be covered through your prescription drug benefit.

Specialty Medications (SP)

This formulary document also includes specialty medications. Specialty medications (SP) can be described as drugs that are high cost, highly complex, or typically require specialized administration, handling, or distribution. They are used to treat rare or complex conditions. These medications may process differently depending on your plan design and may require prior authorization and/or have other restrictions.

Utilization Management Programs (QL, PA, ST)

- Quantity Limit (QL) - medication may be limited to a certain quantity
- Prior Authorization (PA) - your provider is required to provide additional information to determine coverage
- Step Therapy (ST) - lower-cost medication(s) must be tried before higher-cost medication(s) can be covered

Please note: Some plans may not utilize one or more of these (QL, PA, ST) programs. In the case where the plan does not use the program, the medication will not be subject to the terms of that particular program regardless of what is listed in the Notes column.

Analgesics - Drugs for Pain	3	Gastrointestinal Agents - Drugs for Acid Reflux and Ulcer	11
Analgesics - Drugs for Pain and Inflammation	3	Gastrointestinal Agents - Drugs for Bowel, Intestine, and Stomach Conditions	12
Anesthetics	3	Genetic or Enzyme Disorder: Drugs for Replacement, Modifiers, Treatment	12
